Final-year engineering student at ENSA Tétouan, I bring a **rare hybrid profile**: defensive cybersecurity (SOC / SIEM / SOAR), **industrial systems security OT/ICS** (Modbus, PLC, IT/OT segmentation) and embedded electronics (FPGA, ESP32). I am seeking a **final-year internship (Feb–Aug 2027)** in industrial security, SOC or secure embedded systems, with a view to long-term hiring.

SKILLS

OT / ICS Security

SCADA & PLC, Modbus protocol, IT/OT segmentation & monitoring, industrial environment simulation

SOC / Blue Team

Wazuh (SIEM), TheHive 5, Shuffle SOAR, detection rules, incident handling

IDS / IPS

Suricata, VNet segmentation, NSG rules & custom signatures

Pentest / Red Team

Kali Linux, Metasploit, Burp Suite, OWASP, malware analysis

Cloud Security

Oracle Cloud (OCI), Microsoft Azure

Embedded Systems

FPGA (VHDL, Verilog), ESP32, Arduino, Raspberry Pi, MQTT, circuit design

Development

Python (Flask, Scikit-learn), C, Java (JavaFX, JDBC), JavaScript/React, SQL

Networks & Systems

TCP/IP, firewall, iptables, Linux, Windows • QA / security testing

CERTIFICATIONS

 ISC² — **Certified in Cybersecurity (CC)**

Microsoft Certified — **Cybersecurity Business Professional** (2026)

Cisco — **Ethical Hacker**

Force-N — **Junior Cybersecurity Analyst** • AI

Alison — **Diploma in Ethical Hacking**

LANGUAGES

French — native

English — advanced

Spanish — basics

COMMUNITY & LEADERSHIP

General Secretary, **Ensate Int'l Students Club** (50+ members)

Deputy General Secretary, **AEBM** Tétouan

FLAGSHIP PROJECT — INDUSTRIAL IT/OT SECURITY

ShadowFactory — SOC Red Team vs Blue Team on IT/OT infrastructure

2026

R&D • OT/ICS

- Deployed a **full SOC** (Wazuh, TheHive 5, Shuffle SOAR) on Oracle Cloud monitoring a multi-VM **IT and OT** environment simulating an industrial plant.
- Built **15 custom detection rules** across 5 attack phases: network scanning, SQL injection, AD lateral movement, **OT pivoting** and **PLC manipulation via Modbus**.
- Implemented an **automated response workflow (SOAR)**: detection → IP blocking via iptables → incident case creation in TheHive.

PROFESSIONAL EXPERIENCE

Internship — QA Tester Web/Mobile • L3M

Jun. 2026 – Present

Functional, regression and security testing on web and mobile applications; writing test plans, test cases and bug reports; agile collaboration with development teams.

Internship — Cybersecurity & Machine Learning • Brainwave Matrix

Apr. – May 2025

Phishing URL scanner (Python, Flask, Scikit-learn) classifying URLs in real time, and a password strength checker following OWASP standards (Python, Streamlit).

EP Manager (OGX–OGT) • AIESEC Tangier

Feb. – Jul. 2025

Managed and coordinated international internship programs; guided young talents toward impactful professional opportunities abroad.

COMPETITIONS & TECHNICAL PROJECTS

MACC — Morocco Academia Cyber Competition — first national student cyber competition (DGSSI, 3,000+ participants): CTF, Cyber Drill and Capture-The-Evidence challenges, as part of an ENSA Tétouan team. (2026)

IDS/IPS Cloud on Azure — Suricata 8.0.4, VNet segmentation, NSG rules, 50,000+ active signatures + 4 custom detection rules. (2026)

AI-driven Solar Tracker — embedded ESP32 + AI algorithms, Flutter mobile app, Firebase backend for monitoring & prediction. (2025)

Forest fire detection — IoT ESP32 + MQTT, Random Forest ML, real-time web dashboard. (2025)

FPGA smart parking — VHDL, finite-state machine (FSM), automatic barrier control, occupancy display, 50 MHz. (2024)

HePRAS healthcare system — patient records, appointments and billing (Java, Oracle DB 21c, JDBC), role-based access control with SHA-256. (2024)

EDUCATION

Engineering Cycle — Cybersecurity & Embedded Systems • ENSA Tétouan

2024–present

IT/OT security, embedded systems (FPGA, microcontrollers), industrial networks, offensive/defensive security, embedded AI.

Preparatory Cycle for Engineering Studies • ENSA Tétouan

2022–2024

Intensive training in mathematics, physics, computer science and algorithmics.
